affordable for all

VINNO6 Innovative and compact, a real game-changer.

VINNO6, the innovative portable color ultrasound system brings to you the advanced technology of our original RF ultrasonic metadata platform, creating a light, intelligent, and powerful tool.

- The unique RF platform results in much better image quality in resolution and contrast.
- Xcen high frequency technology adds more wideband than a normal probe to improve resolution and contrast for better diagnosis.
- Pure Wave Probe Technology improves the penetration and Color sensitivity.
- Perfect 3D/4D technology with STIC, Mcut and Auto NT, fulfill all obstetric application.
- HQ 3D image: provides high definition 3D image quality.
- Smart touch user interface fully utilizes touch panel possibility for easy operation, such as rotation of 3D rendering image and comment.

Interventional room/operating room

Needle Enhancement Technology, display the needle tips clearly, puncture accurately. Super sensitive touch screen can also be operated with medical gloves.

Emergency / Outdoors / Stadium

Intelligent teaching process provides comprehensive and professional guidance of operation Convenient transfer function ensures fluent information and supports remote diagnostic solutions at the same time

Musculoskeletal physiotherapy

Thanks to VTissue technology, up to 22MHz Xcen linear probe and the unique RF platform, VINNO6 provides excellent clinical imaging.

ICU/CCU

Specific pure wave probe technology provides better penetration and color sensitivity, and TView technology improves resolution of the near field image.

Thanks to VTissue technology, up to 23MHz Xcen linear probe and the unique RF platform, VINNO6 provides excellent clinical imaging.
